

2026 GPA Midstream Convention

Midstream's premier annual event is attended by 1,800+ professionals from around the world. This is the ultimate destination to connect, collaborate, and explore the latest industry trends and innovations along with peers, technical experts, and C-suite executives.

CONVENTION OVERVIEW

GPA Midstream Convention is a four-day industry gathering featuring technical sessions covering operations, safety, emission reduction strategies, as well as regulatory and commercial updates. Attendees participate in workshops, panel discussions, and presentations about innovative technologies to make midstream smarter, safer, and more efficient. Earn continuing education credits while networking with peers and industry experts sharing best practices across the midstream sector.

TOP REASONS TO ATTEND

- Build your professional network by connecting with operators, suppliers, customers, and industry leaders.
- Attend advocacy, technical, safety, and communications committee meetings and forums and be part of creating midstream's future.
- Hear from a legend: Celebrate the 50th Anniversary of the Peng-Robinson Equation of State with co-developer Dr. Ding-Yu Peng.
- Engage with world-class speakers, including Center Stage Luncheon keynote, author and economist Dr. Pippa Malmgren.
- Choose from over 50 presentations covering operations, engineering, AI, safety, environmental issues, communications and commercial trends.
- Earn continuing education credits while learning from industry experts.
- Professional Ethics for Engineers Training
- Sporting Clays Networking Event
- Opening Reception & Vendor Night
- Hospitality Night — meet future partners in a fun setting.
