

GPSA Engineering Data Book Non-Member Subscription

The GPSA Engineering Data Book is a foundational guide for technical professionals throughout the oil and gas value chain since 1935, and is *free* to all member company employees. It's now available to *non-member individuals* via a one-year, \$100 online subscription. Interested in free company-wide access to the Data Book? [Become a member!](#)

ABOUT THE ENGINEERING DATA BOOK

Originally released as a small booklet heavy on advertising and light on technical detail, the Data Book has evolved over almost a century into a nearly 1,000-page, ad-free technical manual recognized globally as an authoritative source for design and engineering information. It is a go-to reference for technical professionals throughout the oil and gas value chain. After 14 print editions, since its debut, the Data Book now lives in the GPA/GPSA documents cloud, and it is revised and updated quarterly.

BOOK SECTIONS

- Product Specifications
- Measurement
- Instrumentation
- Relief Systems
- Storage
- Separation Equipment
- Fired Equipment
- Heat Exchangers
- Air-Cooled Exchangers
- Cooling Towers
- Pumps & Hydraulic Turbines
- Compressors and Expanders
- Refrigeration
- Prime Movers for Mechanical Drives
- Hydrocarbon Recovery
- Fluid Flow and Piping
- Utility Systems and Maintenance

- Fractionation and Absorption
- Dehydration
- Hydrocarbon Treating
- Sulfur Recovery
- Physical Properties
- Thermodynamic Properties
- Phase Equilibria

HOW TO SUBSCRIBE

- Visit GPAMidstream.org and click on Member Login.
- Log in with an existing account, or create a free account.
- Click Subscriptions on the left-hand tab.
- Select GPSA Engineering Data Book FPS Annual Subscription and click Add to Cart.
- Click Review & Checkout.
- **Price:** \$100/year
